# Craft Spline Speed-Controller

# 50% off this October

## Splines without percentages

With Craft Spline Speed-Controller you can create waypoints in your scene. These waypoints will tell Craft Spline Speed-Controller's Carriage to pause, stop, go a particular speed, etc. This is a very powerful alternative to working with regular spline curves because you're not working with percentages along the spline, you're working in world coordinates

- ▶ As a camera rail tool, controlling the speed of Craft 4-Wheeler Extended when it's in Autonomous Mode (following a spline path), a roller coaster, etc.

Now RM 598 only

normal price RM 1,198.00
